**Importance:** High

I have been in a meeting and just saw this. We do not establish career and technical education programs. We would like the definition we provided. It's not much longer than what you are providing and it will be much clearer to districts what we are talking about.

I think that would work, Tracy.

This seems very cumbersome to insert into s. 118.33 (1) (a) 1.

Current language for science credit says award "a science credit for successfully completing ... each course in agriculture that the department has determined qualifies as science according to criteria established by the department." Can I just say "a course that satisfies the requirements of a career and technical education program established by the department"?

Not in statute, can you use this definition?

- A Career and Technical Education (CTE) Concentrator is a student who has completed a minimum of two CTE courses within a student's career pathway and is enrolled in another CTE course in that same pathway.

I talked to Tony late yesterday and he said that he had discussed with Luther and Steve the idea of encouraging more CTE through the three years math and science. Following up on that discussion, would it be possible to get a simple to the sub with the language below? My understanding is that Tony had talked about this concept with the Governor's office as well. Our proposed language is as follows:

A school district may permit a pupil who is a CTE Concentrator to substitute a CTE course for up to one credit each of math and science toward the graduation requirements in s. 118.33. A CTE Concentrator pupil must meet the definition under the federal Carl Perkins IV Act.

This amendment would target flexibility toward students who are dedicated to CTE pathways and would hopefully move to encourage other students to consider CTE Concentrator status.

Let me know what you think.
